An aerial photograph of Jerusalem, showing the Old City and surrounding hills. Two red circular callouts are overlaid on the image. The left callout highlights the Dome of the Rock, a large mosque with a prominent golden dome. The right callout highlights the Mount of Olives, a hillside with numerous olive trees and several churches, including the Church of the Ascension. The foreground shows a dense residential area with many small buildings, some with satellite dishes on their roofs. The sky is clear and blue.

REVELATION 12:7–9

⁷And **war broke out in heaven**: Michael and his angels fought with the dragon; and the dragon and his angels fought,

⁸but they did not prevail, nor was a place found for them in heaven any longer.

⁹So the great dragon was cast out, that serpent of old, called the Devil and Satan, who deceives the whole world; he was cast to the earth, and his angels were cast out with him.

Satan's Most Dangerous Tool

Artificial Intelligence (AI) Defined

Artificial intelligence is:

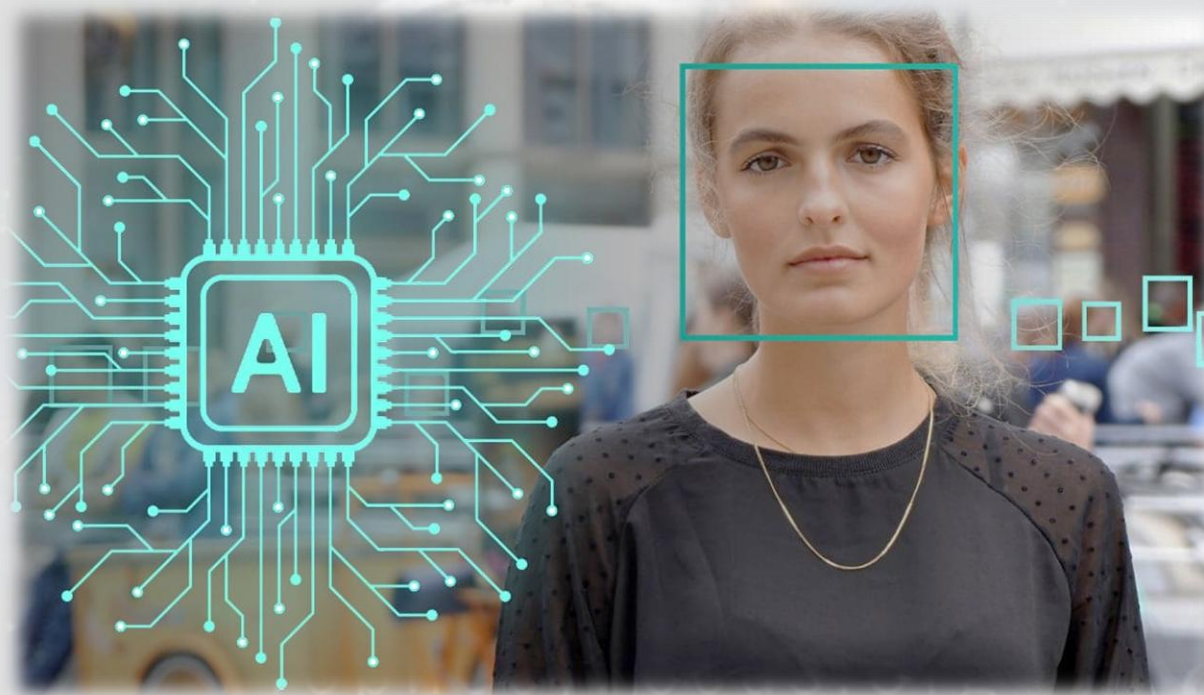

the ability of a digital computer or computer-controlled robot to perform tasks commonly associated with intelligent beings. The term is frequently applied to the project of developing systems endowed with the intellectual processes characteristic of humans, such as the ability to reason, discover meaning, generalize, or learn from past experience.

Facial Recognition Now Part Of Being A Fan At Many Stadiums

Megan Jamerson October 23, 2024

Stadiums across the country from **New York's Citi Field** to **San Diego's Pechanga Arena** are using facial-recognition technology with fans.

The Intuit Dome, a new **\$2 billion stadium** in Inglewood, California, is taking the tech further by combining it with a smartphone app — betting that people will be OK with a little more data collection.

The app knows all kinds of stuff about him. It could tell if he gets out of his seat and the photos he might take in the stadium.

If he decides he wants a hot dog, the app is already connected to his credit card, so he could use his face to pay.

In trade, the venue collects a lot of data, including browsing activity and employment information.

The Intuit Dome declined to give an interview but in an email said it doesn't sell data to third parties.

According to the [privacy policy](#), it uses the personal information it collects to provide services.

China Changing Its Stance On Facial Recognition

14 August 2023

ProphecyFocusMinistries.Com

Today, the Chinese facial recognition system logs nearly every citizen, with a vast network of cameras nationwide.

Every move in cities around China is being captured digitally.

To put into context [how heavy surveillance is](#) in China, it is essential to know that the country has over 700 million surveillance cameras, according to online data.

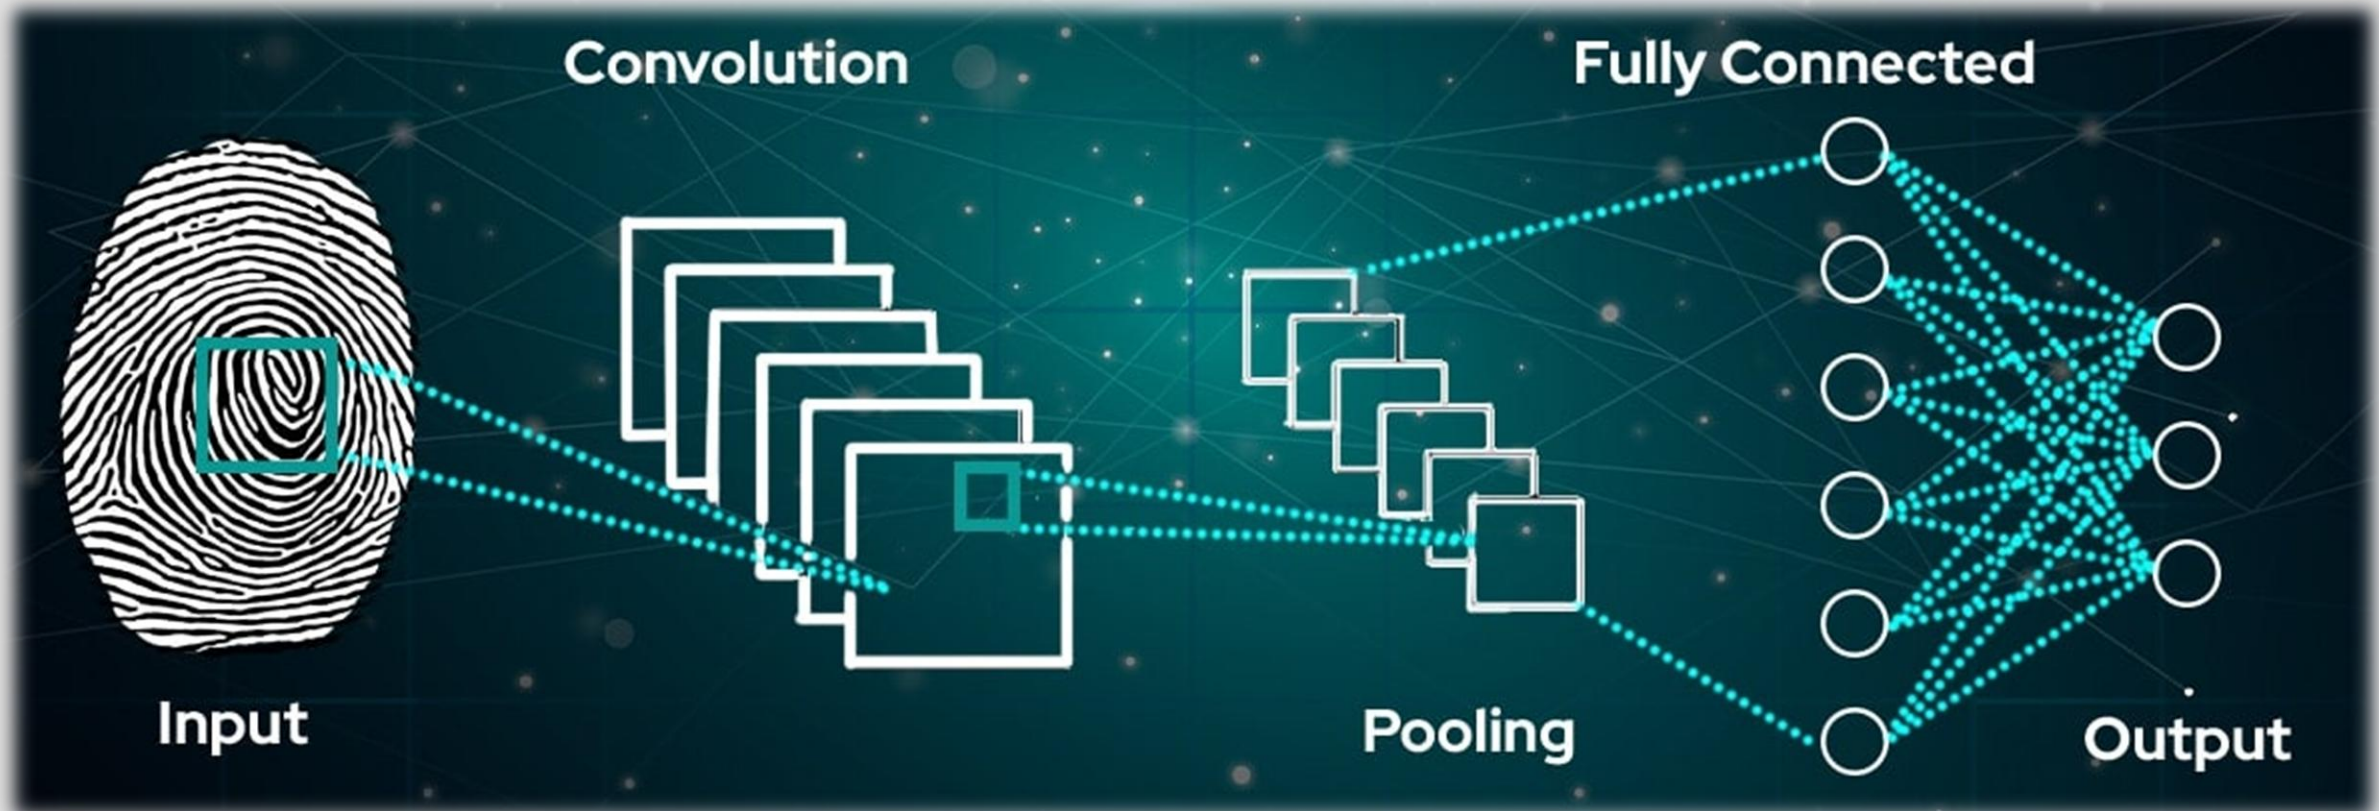

That means there is one lens for every two citizens.

Level Seven - Artificial Super Intelligence (ASI)

ASI systems would solve problems that are currently beyond human comprehension and may have the ability to improve themselves without human intervention

Present Levels of Artificial Intelligence

Level One - One-Rule Artificial Intelligence

The first level of AI is a one-rule or knowledge-based system.

This level of AI consists of algorithms pre-programmed to perform a specific task.

Level Two – Context Based Artificial Intelligence

Context-based AI systems include smart application assistants such as:

- Alexa,
- Google Assistant, and
- Siri.

The AI system analyzes the historical data from previous users and then customizes its response for an individual user.

The advanced effectiveness regards its ability to retain data, and then use that data as a pattern to understand the context of a particular user.

Unveiling the Ten Stages of AI: What You Need To Know Now!, AI TechXplorer, <https://youtu.be/AK5EwG62hx8>,

accessed July 31, 2023

Level Three - Narrow Domain Artificial Intelligence

Advanced AI systems are currently used in:

- Gaming,
- Linguistics,
- Medicine,
- Finance,
- Translation software, and others

This level of AI is able to consume large amounts of domain-specific data, enabling the system to not only analyze the data but provide extremely accurate responses.

Level Four - Rational Artificial Intelligence

RAI is an extremely complicated system that, like the human brain, can reason and make decisions based on the input of complex data.

Machine Learning is behind:

- Chatbots and
- Predictive text,
- Language translation apps,
- Shows Netflix suggests to you, and
- How social media feeds are presented
- Powers autonomous vehicles
- Machines that diagnose medical conditions

Predicted Levels of Artificial Intelligence

Level Five – Self-Aware Artificial Intelligence

The concept of self-aware AI revolves around endowing machines with the ability to perceive, comprehend, and reflect upon their own internal states and cognitive processes.

This level anticipates the ability to express preferences and emotions, translating to the device demonstrating signs of consciousness.

Level Six - Artificial General Intelligence (AGI)

The key features of AGI include one general purpose intelligence, performing any intellectual task that a human can from reasoning and problem solving to creativity and emotional understanding, to adaptability, learning from experience and adapting to new situations and challenges.

Level Six - Artificial General Intelligence (AGI)

AGI promises transformative impacts in:

- Health care
- Education
- Transportation
- Business
- Scientific research
- Environmental sustainability
- Personal assistance

AGI is Coming Faster Than We Think — We Must Get Ready Now

VentureBeat

<https://www.aratek.co/news/how-artificial-intelligence-ai-is-used-in-biometrics>

Level Eight - Transcendent AI

The idea of AI systems having the autonomy to pick and choose their own evolutionary path, leading to self-development and collective intelligence.

Transcendent AI is often associated with the idea of uploading human minds into digital form, or merging human and artificial intelligence.”

Level Nine - Cosmic AI

Some scientists believe that life already exists on other planets, and therefore cosmic AI would provide the technical ability for humans and machines to interact with extraterrestrial beings.

Level Ten - Godlike AI

Immortality, omniscience, omnipotence, and many other attributes of God are desired by mere mortal human beings.

Imagine never having to worry about the possibility of death.

Consider what it would be like to possess an extremely robust understanding of every imaginable subject.

Ponder what it would be like to possess astounding physical strength and become an actual superhuman being. Does this sound tempting?

REVELATION 13:15
